3. PRODUCT DESCRIPTION

Timber Joist Bracket is a robust and reliable accessory designed to securely hold and support timber joists in your pedestal installations. Engineered for durability and precision, this bracket ensures proper alignment and stability, making it ideal for creating raised decking systems. Its seamless compatibility with the NXT Pedestal system allows for quick and hassle-free installation, while its weather-resistant construction ensures long-lasting performance in outdoor environments. Whether you're building a residential deck or a commercial platform, the Timber Joist Bracket provides the strength and support needed for a professional result.

Uses

Designed to securely hold and support timber joists in your pedestal installations.

Applications include:

- Paved areas or raised timber

- Pavers (Porcelain, stone, concrete, etc)
- Timber decking

Suitable Substrates

- Concrete and Masonry Surfaces
- Exterior Glue Plywood decks that have been waterproofed with a primary roof waterproofing membrane
- Metal/Steel

Packaging

1000 PCS per carton

Approximate Coverage

Coverage will vary based on surface finish type and dimensions.

Limitations

DO NOT

- Install any NXT Pedestals upside down for any reason.
- Cut the pedestal for any application.
- Use 4" extenders without a pedestal body and base.

4. TECHNICAL DATA

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

Installation Instructions

STEP 1:

Ensure the substrate is clean, smooth and free of building debris. NXT Pedestals are not suitable for soft surfaces ie. grass, loose gravel, crushed rock, etc. If the substrate is membraned - we recommend using the NXT Pedestal – Base Pad.

STEP 2:

Remove the 5/32" spacer tab and replace with a Timber Joist Bracket

6. AVAILABILITY AND COST

Availability

LATICRETE materials are available worldwide.
