Explore the SUPERCAP® System

Benefits Far Beyond Flat Floors

For the Builders of a Better World™

Our System is Flexible to the Demands of your Job.

Go in early,

before the interior walls are up. There's no need to spend extra time and money bull-floating to try to get a flat slab, only to have it cure out-of-spec. With LATICRETE® SUPERCAP®, you get a flat floor – ideal for constructing a better building faster.

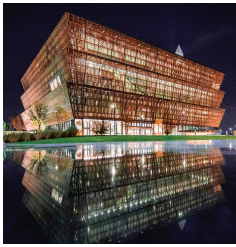

Go in late,

after the interior walls are up. If you find that the floor needs remediating, SUPERCAP self-leveling underlayment flows into all crevices and imperfections to allow for quicker door hanging and trim work.

Perfect for renovations.

Because our system has such a low impact on your building in terms of manpower, equipment and silica dust, it is perfect for renovations where portions of the building are still in use or space is limited.

Alan Karchmer/NMAAHC

BY POURING UP TO 50,000 SQ FT A DAY, LATICRETE® SUPERCAP® SELF LEVELING UNDERLAYMENT SYSTEM WILL CREATE AN IMPRESSIVE OPENING IN YOUR SCHEDULE.

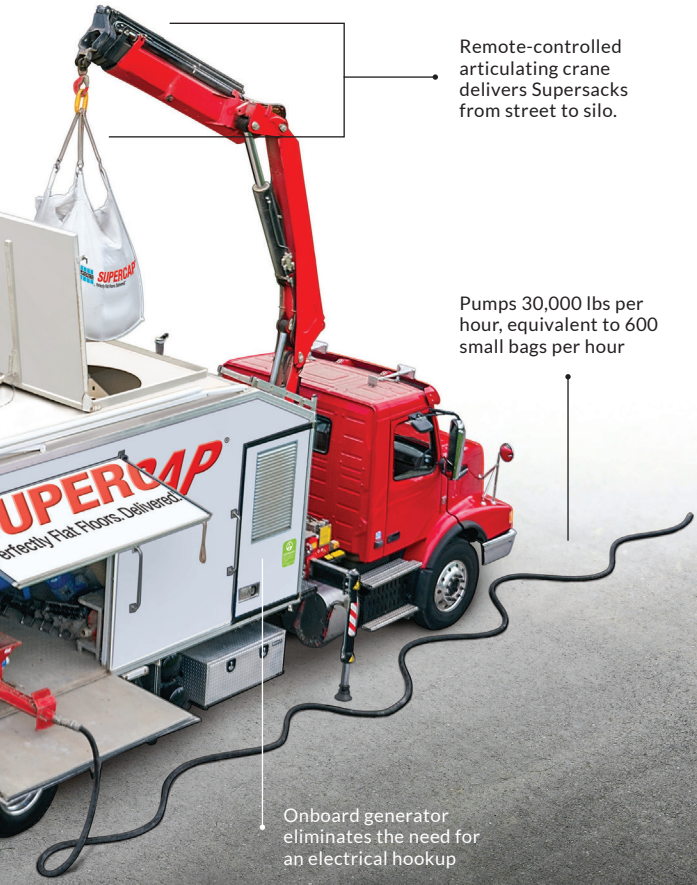

The SUPERCAP System: Great for flat floors, shortening schedules, and safer job sites.

Combining premium self-leveling underlayment with a patented mobile blending unit, our system delivers extremely flat floors at a high production rate. Faster installation means greater efficiency for every trade that follows, without lift congestion or harmful dust on the job site. It's a safer, more efficient approach to floor preparation.

We bring the manufacturing plant to you.

Now available: SUPERCAP® on-demand delivery service.
You prep, prime, and place. We supply the material and pumping system. You pay only for the material delivered wet-out-of-the-hose, giving you access to the SUPERCAP System without the upfront equipment investment.

Remote-controlled articulating crane delivers Supersacks from street to silo.

Pumps 30,000 lbs per hour, equivalent to 600 small bags per hour

Onboard generator eliminates the need for an electrical hookup

Precision controls for consistent mixing

Automated usage reports

Expertise Across Commercial Construction.

Today's Class A commercial and public buildings require great planning that includes coordinating trades and reducing waste, risk, and the general chaos that are common to jobsites. Installing dry and flat floors is essential to faster, quality build-outs.

Architects and designers now have years of experience specifying SUPERCAP® as well. Designers are pushing boundaries with custom interiors that incorporate modern flooring systems such as LVT, LVP, resilient, large-format tile, and engineered wood flooring. Behind every successful installation is a dry, flat, and durable surface built to support the vision

Best-in-class building starts with SUPERCAP.
Our system is perfect for the following segments:

- Healthcare
- Corporate
- Education
- Hospitality
- Multi-use public spaces
- Luxury high-rise
- Retail & showrooms
